DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 7, 14, and 21 are rejected under 35 U.S.C 101 because the claim invention is directed to non-statutory subject matter.

As to claims 7, 14, and 21, a controller capable of automatically choosing one of a plurality of radio frequencies, the phrase "capable" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention (controller capable (able)) . Therefore, nonstatutory subject matter.

Allowable Subject Matter

2. Claims 2, 9, and 16 are allowed.

Applicant's independent claims 2, 9 and 16: The present invention is directed to a first access point operable to provide wireless network access to client devices couple to a wireless network, the independent claim identifies the patentably distinct feature "an indicator operable to provide an external indication of the signal strength directly from the first access point to a human being, the indication being perceivable by the human being and also being indicative of the signal strength of the second access point, whereby proximity of the second access point relative to the first access point can be estimated by the human being directly from reference to the first access point without knowing the precise geographic location of the second access point".

Art Unit: 2617

Applicant's independent claims 2, 9 and 16 comprise a particular combination of elements, which is neither taught nor-suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
